Art Unit: 1614

Claims 1-34 are presented for examination.

***Claim Rejections - 35 U.S.C. § 112***

Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 14 and 33 are rendered indefinite and vague because the claims does not disclose who or what is the second active ingredient.

***Claim Rejections - 35 U.S.C. § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made

Art Unit: 1614

in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chastain et al. (B) in view of Chastain et al. (A).

Chastain et al. (B) teach perillyl aldehyde and perillyl alcohol as having anti-fungal activity. (See column 2, lines 8 and 9)

Claims 2-13 and 1-21 are rejected to because they depend upon a rejected.

The instant invention differs from the cited reference in that the cited reference does not teach the addition of a second active ingredient, such as perillyl alcohol is used as a fungicide and a bactericide. However, the secondary reference Chastain et al., (A) teaches perillyl alcohol as possessing antibacterial activity too. Clearly, the combination of the two individual ant-fungal and anti-bacterial agents into a single composition to achieve the same results is clearly obvious to those skilled in the art. (See claims 22 and 23).

Claims 1-34 are not allowed.

The remaining reference listed on the enclosed PTO-892 is cited to show the state of the art.
